CARRIER

C08

Work with skips on site? You'll love the unloading height of the compact C08 tracked dumpers. With a tipping height of 1,500 mm, they're perfect for unloading into skips and passing items over garden fences and onto raised work areas. The Hi-Tip is tough, too, with oscillating rollers that ride the rough ground with ease and keep your generous payload of 800 kg stable. The C08 is as comfortable removing materials from waste sites as it is transporting them.
